RE: Electrical Vehicle Charging Station

Dear County Board of Commissioners:

This letter is to request permission to place an Electric Vehicle charging station on County property in the Warren County Memorial Library parking lot.

The Town of Warrenton was recently awarded a grant from Duke Energy to purchase and install three (3) EV charging stations. Two of these charging stations will be placed along sidewalk in the courthouse square area. Our hope is that the remaining station could be placed at the library.

Upon installation these charging stations will be mapped nationally and known to all electric vehicle owners through their mobile apps. Speaking with Director Reddish I believe it would be a good fit, encouraging future traffic and visitors to Warren County's impressive library and reflecting well on the library's technology focus.

The charging station will require its own parking space and there will be an approximate \$5 per month fee for electricity, because the charging station must be connected to library power. (The worst case scenario for electricity costs is \$30/month, assuming a car is charging every day of the month for eight hours a day.) On the other hand, all installation and ongoing maintenance costs will be borne by the Town of Warrenton. If needed, the Town's attorney can draw up an agreement to reflect that responsibility.

We humbly ask for your permission to locate on County property.

Kind regards,

Robert Davie
Town Administrator
